PROFILE

A graduate of the Computer Science program at Itenas, specializing in Full-Stack Web Development and Machine Learning implementation. A graduate of the Bangkit Academy program (Google Cloud Engineer). Experienced in building real-world digital solutions, ranging from real-time mosque information systems to architectural portfolio platforms using modern tech stacks such as ReactJS, Laravel, and Node.js. Dedicated to combining robust programming logic with user-centric UI/UX design to create impactful digital products.

WORK EXPERIENCE

- **Junior Web Developer** — **SKILLS:** PHP, JS, TAILWINDCSS, REACTJS, UI?UX
  PT. Pentacode Digital Bandung — NOV 2024 - MAR 2025

  During my internship, I was fully responsible as a Front-end and Back-end Developer for the development of a multifunctional website for a mosque. This project includes the integration of real-time location-based prayer schedule API, a secure online donation system, as well as the management of mosque activity information through CRUD features for admins. so that donations can be targeted and mosque activity information can be better distributed.

PROJECT EXPERIENCE

- **Web Mosque Al-kautsar** — **SKILLS:** PHP, JS, TAILWINDCSS, REACTJS, UI/UX,

  Developed a website for Al-Kautsar Mosque with the aim of facilitating the dissemination of information on mosque activities, prayer schedules, and online donations. Responsible for Front-end development to create a user-friendly and responsive interface, and Back-end to manage data efficiently.

- **Web ARdes.Studio Arsitek Consultant** — **SKILLS:** HTML, JS, TAILWINDCSS, UI/UX

  Ardes Studio Bandung is an architectural consulting firm that provides building planning, 3D design, and budget estimation (RAB) services. This website showcases project portfolios, offered services, and features for booking and online consultations, making it easier for clients to access information and services from Ardes Studio.

- **Mosque Digital Information System** — **SKILLS:** UI/UX HTML5, CSS3, TAILWINDCSS, JAVASCRIPT (VANILLA/ES6), NODE.JS, EXPRESS.JS, MYSQL

  Utilizing television as a digital information medium opens up significant opportunities for disseminating religious content in a more modern way. Through the integration of web-based systems, this medium can transform into a dynamic, informative, and relevant information delivery center in line with current technological developments.
